

Delete a Group

Deleting a group permanently removes it from the system. Before deleting a group, consider the impact it will have on members of that group. They will no longer be able to access applications they were authorized to use based on membership to that group.

You cannot delete the "All Users" group.

To delete a group

1. On the Admin Portal navigation bar, click **Groups**.
2. Click the **Delete** link next to the group name.
3. Click **OK** to confirm that you want to delete the group.
