

View All Inspection Reports

From the Reports page, you can run the Inspection Reports report to list all Inspection Reports generated for apps in the App Catalog. The Inspection Reports report lists reports for both current and old versions of apps, as well as disabled apps. It does not list reports for apps that have been deleted from the App Catalog. From the Inspection Reports report, you can click a link to view any of the reports.

For instructions on requesting an inspection of an app and viewing the Inspection Report from the app's details page, see [Inspect an Application](#). For information on the content of an Inspection Report, see [Application Inspection Report](#).

To view a list of all Inspection Reports

1. On the Apperian Portal navigation bar, click **Reports**.
2. On the **Reports** page, click **Inspection Reports** to run the Inspection Reports report. The report appears in HTML format. Optionally, you can download the report to a CSV file. For more information on working with a report, see [Run a Report](#).

The following table describes the columns in the Inspection Reports report:

Column	Description
Application Name	Name of the application as defined in Apperian.
Version	Version of the application as defined in Apperian.
Created	Date and time when the Inspection Report was returned by the inspection service provider.
Report Link	Link to the report in a separate browser window/tab.
Report Provider	Name of the inspection service provider (Kryptowire).

3. To view the Inspection Report for a particular app, click the link in the **Report Link** column.
