

Delete a Category

You can delete a category from the system. Deleting a category does not remove any of the apps that belong to that category, but the category will no longer be listed when the user displays the Categories list of the App Catalog.

To delete a category

1. On the Admin Portal navigation bar, click **Categories**.
2. Click the **Delete** link next to the category name.
3. Click **OK** to confirm that you want to delete the category.
